- Through his role, he has actively contributed to the development and implementation of strategies to nurture and empower emerging entrepreneurs.

4. Agenda and Schedule of the Activity

The workshop was carried out for the following key points specially designed for Startup enthusiasts

- 1. Knowledge Enhancement:** To enhance participants' understanding of prototype process design and development, including the different stages, tools, and techniques involved. By the end of the workshop, participants should be able to articulate the importance of prototypes in the engineering design process and comprehend the role of prototyping in product development.
- 2. Practical Skills Development:** To provide participants with hands-on experience in prototyping through interactive sessions and practical exercises. Participants will learn how to apply various prototyping methods, tools, and technologies to transform ideas into tangible prototypes.
- 3. Collaboration and Teamwork:** To foster a collaborative environment where participants can work cross teams to tackle prototyping challenges. The workshop will include cross team activities and team idea presentations, enabling participants to strengthen their teamwork, communication, and problem-solving skills while working towards a shared goal.

Agenda of the Event:

1. To make the Students understand the key aspects of Prototype design
2. To help Students to work on their Product development

Schedule of the Event:

1. Date: 19/05/2023 & 20/05/2023
Timing: 09.00 am to 5.00 pm
2. Mode of Event: Offline

5. Objectives and Outcomes of the event

Objectives of the Session:

1. To provide students with comprehensive knowledge and practical skills in the field of prototyping.
2. The workshop aims to equip participants with a solid foundation in the principles, methodologies, and best practices of prototype process design, fostering their ability to ideate, design, develop, and iterate prototypes effectively.

Outcomes of the Session:

1. Knowledge Enhancement: Sessions were taken in 3 phases, ideation, prototyping and validation. Real world examples were used to teach participants about the importance of ideating in more of a customer centric approach. Exercises like crazy 8's were used to bring out 8 different ideas from 8 different sectors in 24 minutes which were later evaluated by others to bring out the top 3 ideas which the participants should be working on for the rest of the workshop. As per the student rating, we can conclude that we were able to ignite a data driven ideation thought process.

Certain feedback has been shared below along with the student rating. Overall our aim was to bust some myths which students usually have for ideation and prototyping

Any reason onto why you've rated that? (based on above question)

Nothing

The trainers were really good solving our doubts

Lively workshop attended for first time ever

It was very informative and got to know about prototype designing

It helped us to gain knowledge

Interactive and interesting

Smg new v have learnt

It's was good

Was understanding the Prototype Development Lifecycle worth?

2. Practical Skills Development: Crazy 8, 5 Whys (Root Cause Analysis tool) and Story-Boarding were the practical methodology used during the workshop to make students understand certain steps of ideating validating and prototyping. They were given a task to apply the same methodology to their own ideas and see the difference. It was an eye-opener where students realized that finding a real problem is way more difficult than finding a solution.
3. Based on the student feedback they will be requiring some technical and business mentorship for which we are open to supporting them with any and all support that we can provide. Students are looking for more such workshops and it will be beneficial to have more days so that we can plan it in a more practical way.

Innovative entrepreneurship can provide ideas that help grow new and existing businesses, develop products to improve local communities and encourage change to enhance customer experiences.

Agenda of the Event:

1. Entrepreneurship & Startups
2. Why Startups are needed.
3. Ideation & Innovation,
4. Support system available for budding entrepreneurs.
5. Startup Ecosystem
6. Funding opportunities

Schedule of the Event:

1. Date: 10th January, 2023
2. Timing: 10 A.M. – 4 P.M.
3. Mode of Event: BITM Auditorium (Offline)

Summary of the event:

Ballari Institute of Technology and Management, as per the regulations of Ministry of Innovation Cell (MIC) to foster the culture of innovation and start-up ecosystem in campus under the association of Institutions Innovation Council -BITM, Department of Management Studies has organized an online workshop on "Yuva Entrepreneurship Skills, Attitudes and Behavioural Development".

5. Objectives and Outcomes of the Activity

Businesses and the society at large are today challenged by rapid technological changes within several areas. Developments within digitalization of services, big-data analytics, artificial intelligence, 3D printing, renewable energy and biotechnology are broad and profound. Most industries and areas of government services will be affected and will need to adapt. In such an environment, faced with an unstable and constant change, the ability to work across disciplines, successfully adapt, innovate and stay resilient, will be a highly valued skill.

Workshop on “**Entrepreneurship Skills, Attitude and Behavior Development**” gives students the opportunity to combine their science and engineering background with business skills. Having this combination is highly beneficial and relevant in both well-established organizations as well as in start-ups. As such, the programme provides the students with knowledge and capabilities that open the door to several career paths. Founding your own business or joining a start-up; not necessarily right after your studies but also later in your career after building relevant sector-specific know-how and network. Start working in an established company as a business developer, project manager, management trainee, management consultant or investment manager in a range of knowledge based sectors. Such sectors include ICT services, biotechnology, pharmaceuticals, and energy.

Objectives of the Session:

1. To foster the culture of Entrepreneurship and Start-up ecosystem among the students.
2. To create awareness among students to possess entrepreneurship skills and attitudes.
3. To encourage students to enhance their behavioural development skills.
4. To inspire the complete architecture of the Entrepreneurship life cycle and how student can generate pioneering product by undertaking relevant methods.
5. To exhibit global entrepreneurship activity – rising share of India and different types of entrepreneurship.

Outcomes of the Session:

1. To appreciate the essentials of Entrepreneurship and its prominence in modern society. Students will develop the startup culture and ecosystem as their goal.
2. They will start developing the skills and attitudes required to be a young entrepreneur.
3. They will learn the strategies of developing behavioural skills to be an employer.

4. Agenda and Schedule of the Activity

Entrepreneurship is important for growing the economy, creating jobs and improving the quality of life while adapting to modern societal needs. Innovative entrepreneurship can provide ideas that help grow new and existing businesses, develop products to improve local communities and encourage change to enhance customer experiences.

Agenda of the Event:

1. Job V/S Business A Career Option
2. Is Idea The Only Mantra
3. Right Time To Start Our Business
4. Process Of Start-Up
5. Idea Generation To Prototype
6. Funding And Sales

Schedule of the Event:

1. Date: 18th November, 2022
2. Timing: 11 A.M. – 1 P.M.
3. Mode of Event: Microsoft Teams (Online)

5. Objectives and Outcomes of the Activity

Businesses and the society at large are today challenged by rapid technological changes within several areas. Developments within digitalization of services, big-data analytics, artificial intelligence, 3D printing, renewable energy and biotechnology are broad and profound. Most industries and areas of government services will be affected and will need to adapt. In such an environment, faced with an unstable and constant change, the ability to work across disciplines, successfully adapt, innovate and stay resilient, will be a highly valued skill.

Workshop on “**Entrepreneurship and Innovation as a Career Opportunity**” gives students the opportunity to combine their science and engineering background with business skills. Having this combination is highly beneficial and relevant in both well-established organizations as well as in start-ups. As such, the programme provides the students with knowledge and capabilities that open the door to several career paths. Founding your own business or joining a start-up; not necessarily right after your studies but also later in your career after building relevant sector-specific know-how and network. Start working in an established company as a business developer, project manager, management trainee, management consultant or investment manager in a range of knowledge based sectors. Such sectors include ICT services, biotechnology, pharmaceuticals, and energy.

Objectives of the Session:

1. Encourage the prominence of Entrepreneurship and innovation as career opportunity and implant skillset mandatory for a young graduate.
2. To inspire the complete architecture of the Entrepreneurship life cycle and how student can generate pioneering product by undertaking relevant methods.
3. To exhibit global entrepreneurship activity – rising share of India and different types of entrepreneurship.

Outcomes of the Session:

1. To appreciate the essentials of Entrepreneurship and its prominence in modern society.
2. Skill set compulsory to become an Entrepreneur and how to change modest idea into an innovation.
3. Key performance indicator of a graduate likely to develop an Entrepreneur.
4. Students will apply their thought process to be an employer rather than employee.

11/06/2022:

- This is the Deshpande Dialogue “**THE SANDBOX STARTUPS**”.

- **MORNING SESSION:**
STORIES OF SANDBOX:

The experiences were shared from the expertise who grew up as a founders of their own companies from “The Deshpande foundation”.

1. **Mr.Sasi sekar krish:**

- Founder of Nanopix.
- Manufacturer of trackball, cashew processing machine.

2. **Shravani Pawar:**

- Fonder of safehands.
- Gave an opportunities for women.

3. **Vijay Krishnappa:**

- Founder of Laundry industry named as “**KOSHA**”.

- Found a small thing which helps handloom weavers to know the genuine quality of the fabric.

INFINITY STUDIO: Island For Futuristic Innovation And Technology Student And Innovation.

- It is a studio for startups and entrepreneurs.
- It is a studio which shapes imaginations to a great reality.
- Infinity studio is the combination of 4 labs.
 1. Smart lab
 2. 3D lab
 3. Mechanical lab
 4. Electronic manufacturing lab
- People come here with an idea which turns into a prototype and becomes into the final product.
- In infinity studio many prototypes were present. Prototype is something which looks alike and works alike a product but not the final product.

SMART LAB: It is an electronic lab, space for IOT and ROBOTICS startup.

- Started in the 2017 where in government of Karnataka supported for electronic manufacturing.
- 45+ startups were supported from past 10 months.
- Currently, there is much need for hardware innovation.

NIDHI PRAYAS:

- It is a startup product which has smart technology of bone conduction.
- It took 18 months to bring up the product.
- It gives a sensation to bones and sends signals to brain where the sounds can be completely felt in entire body.
- It is used in “Indian Army”.
- Technology is the same but the application may vary.

STARTUP DIALOUGE

2022

PLACE: HUBBALI

DATE: 10/06/2022 TO 11/06/2022

INTRODUCTION:

“CELEBRATING THE SPIRIT OF ENTREPRENEURSHIP”

This Event was organized by DESHPANDE FOUNDATION, SANDBOX STARTUPS. The event was to create awareness about Startups to Youths. There was many Youths with their creative ideas and Problem solution in these Program.

In these Event, we all learned so many things and get to know “What is Startup? And How to take our Startup into Market”. In These Event there were many successful people, who shared their ideas and how they overcome their problems.

SASI SEKAR KRISH Founder of Nano-pix. He said that, he had made his project which was 12 feet long and cost 15 lakhs. There was an issue in his machine that, he made wrong connection in his design and later his machine failed. This did not make him to give up, instead he had a hope that he will do it and finally he become success.

HUBBALI was Named for "START-UP HUB".

At Past there was no support for Startups, People were having many ideas but there was no one to support them. Now things are changed a lot, People understand the importance of Startups and many people are coming front to support the Startups. Even Government and Non-Government Organization (NGO) is also coming front to support and Banks also providing Loan up-to 15 Lakhs.

“EDUCATE - EMPLOY - EMPOWER”

We had Went to “SMART LAB AND 3-D LAB”

SMART-LAB: This Lab deals about Robotics and how this Robots will function in Industry. These Lab was full of Innovative things and Surprising elements.

3-D LAB: In these Lab we came to know about 3-D Models and How it functions. If we need to 3-D model then we can use this machine system. Just we should provide a design to the system and the system will make the 3-D model. The Output of these 3-D model is a plastic, Which is eco-friendly to Environment.

They explained us importance of these Lab and thought us many things. We all asked them questions and they said many interesting things.

“START-UP ECO-SYSTEM ATMOSPHERE”

CONCLUSION: In these Educational Tour we enjoyed a lot and Learned many new-things. We Observed that “How they set-up a working Atmosphere, how they interact with each other and there were many quotes on wall, which were carrying depth meaning- how to overcome problem and some were providing energy to work”. Even they provided us Magazine.

These a great Opportunity for us to go to DESHPANDE FOUNDATION at Hubballi. We would like say thanks

Prof. Mallikarjuna A - Incubation Head

Dr. Abdul Lateef - Startup Coordinator (ECE Dept)

Prof. Nilam Chheda - Startup Mentor

Prof. Shridhar S M - Startup Coordinator (EEE Dept)

We Even Convey Our Whole Hearted Thanks to DESHPANDE FOUNDATION for impressive knowledge, providing facilities and Overall Confidence to us.

Thank You

Deshpande Foundation

Deshpande foundation is a non-profitable organization set for startups for every individual with an innovative idea. Dr.Gururaj (desh) Deshpande and Jaishree Deshpande are founders of this organization. It is located at Hubballi taluk Dharwad district of Karnataka. To cut off the financial crumbs it even helps in investments. More than 45+ startups have been initiated in past 10 months.

A Living Laboratory for Entrepreneurs

Sandbox Startups

The main aim of the sandbox is to create an environment where unconventional approaches to addressing social innovation is encouraged. Sandbox, a 'living laboratory' for local social entrepreneurs to have their ideas tested, strengthened and sustained over a period of time. The Sandbox ecosystem has 4 impact units – Agriculture, Skilling, Micro Entrepreneurship and Startups.

Infinity Studio

(Island For Futuristic Innovation And Technology Student And Innovation):

It is a studio for startups and entrepreneurs. Pitch arena is a space given for individuals where they can meet the investors, mentors and brainstorm their ideas and thought processing. Infinity studio is the combination of 4 labs.

They are as follows:

- 1] Smart lab: IOT and robotic startup
- 2] 3D lab
- 3] Mechanical lab
- 4] Electronic manufacturing lab

1] Smart lab :

Presenter: **Mr. Omkar**

Here we learnt about the process from an Idea to a Product. There were many models available like Bone Sensor Headphones, Drones, Truck (made by a 7th std. boy), mini Robot, PCB.

2] 3D Printing Lab:

Presenter: **Ms. Pooja** - Robotic expert, Design engineer.

Here, there are many 3d Printers. We can use this lab to take a 3D view of our Product, which can be helpful in presenting it in front of Investors. There are many developments done in these Printers.

Investors and Speakers:

➤ **Mr. Sasi Shekar**

- Marketing ability is the key factor in any business.
- Founder of Nanopix.
- 33% Cashew business is from India.

➤ **Shravani Pravar:**

- A great initiative for women safety called as "SAFE HANDS".
- Social entrepreneurship training.
- House keeping business for women and households.
- Following your passion is the biggest achievement in once life.

➤ **Vijay Krishnappa:**

- Founder of swadeshi hand crafted organization called as "KOSHA".
- Great startup and platform for handlooms handicraft.
- Validation of product is the main aim in any product modulation.
- Digitalization, traceability, supply chain management
- A small device which tells whether the product is genuine- 400 artisans

Advantages of entrepreneurship:

- ✓ Change and development in entrepreneurs of India.
- ✓ Eradication of Unemployment.
- ✓ Incubation centers have increased.
- ✓ Digitalization is empowering.

The event started with the chief guest's speech and many founder's opened up with their stories about their startup journey. In which some of their stories are.

1] Suchithra Sasisekar

Who is the founder of nano pix .

It is an hubli based startup funded by Deshpande foundation.

He said his story that , first he made a machine but because of wrong placement of motor the total machine got collapsed. Then he never gave up , with the help of Deshpande startup he again began to make that after 3-4 years his innovation got succeeded.

This company makes cashew grading machines with nano sorter. He also said that After successful launches of cashew grading machines nanoSorter , we

are proud to have launched nanoSorter Garuda, the all new cashew grading machine that gives 250KG Throughput with 6+2 Grades in a Single Pass. Now they also launched product for Almonds sorting and grading.

They also said that they will be finding the machine for sorting solutions for peanuts.

2]Sravani – Founder of safehands 24*7 Service.pvt.ltd

Mrs.Sravani Started the speech by sharing her story she said that she that her parents didn't permit to start her business but, she had passion and intrest in starting a business and to help the womens.

So she didn't said about the business that she had started for upto one year .later on she said about the business then her mother said her to get married but, She refused to get married .

About safehands :

Safe Hands 24x7 was born from a dream of gender equality with hopes of helping women become confident and economically independent while ensuring them empowerment and improved livelihoods. They follow quality with intent in all operations and follow ISO 9001:2015 standards and We follow stringent recruitment procedure for our human resource. They are strong in human resource sourcing and can take up operations with minimum time. We comply to all legal, statutory and regulatory requirements.

3] Vijay Krishnappa - Founder of Kosha

***This startup made which help the companies to check the quality cloths.**

***This device check the whether the given cloth is original or hand made.**

*** KOSHA is on a mission to make "Handmade" the most reputed brand across the world.**

*** Their authentication system leverages the power of IoT, AI, and Cloud Computing technology to deliver trust and authenticity with every product.**

Deshpande startups :It is an eco-system of resources, connections, knowledge & talent to support mission driven entrepreneurs to scale in their venture.

Entrepreneurs call it as a living laboratory to test their business ideas, get it validated, build successful ventures and scale to the greater heights.

***They have supported more than 250 startups.**

***115+ products commercialized.**

INFINITY STUDIO

***This studio helps the students to improve the knowledge and put their ideas into work .**

***This studio helps the students to use their resources for free of cost.**

***This studio helps to practically work on project with circuit designing ,3d printing and prototyping.**

*** The innovation room :**

- **In this room we get components to build a product.**
- **There will be mentors who will guide us in building a product.**
- **They have the best technology .**
- **There were many products like drones,robots ,machines etc... which were already in the market,which they are developd**

3D Printing room:

***In this room we can make the practical model of the innovation which is done through recycled plastic .**

***The models which are made here are water proofed.**

***They use the latest technology which can scan the object and print exact 3D model of it.**

Then we went to the auditorium where :

About the “working design to designs that work”.

**There were many things to be considered for making a
Concept to production.**

Designs that works

1]Reliability

2]Safety

3]Manufacturability

4]Cost

5]Supply chain

6]Sustainability

7]Usability

1] Reliability:

***A function of variance in design and
manufacturing.**

***Reliability is defined as the probability that a product, system, or service will perform its intended function adequately for a specified period of time, or will operate in a defined environment without failure.**

1] Probability: the likelihood of mission success

Intended function: for example, to light, cut, rotate, or heat

2]Satisfactory: perform according to a specification, with an acceptable degree of compliance

3]Specific period of time: minutes, days, months, or number of cycles

4]Specified conditions: for example, temperature, speed or pressure.

2]Safety:The condition of being protected from or unlikely to cause danger, risk and injury.

Connected appliances

Which will need to be considered?

***temperature**

***packing**

***storage**

Can they be designed in after the appliances design is done?

***depends on type of product.**

3]Manufacturability: Manufacturability describes the degree to which a product can be effectively manufactured given its design, cost, and distribution requirements.

***70% of product cost locked by end of design**

***process and supply chain can add to cost and make your product less affordable**

4]cost: Cost of production refers to the total cost by a business to produce a specific quantity of a product or offer a service. Production costs may include things such as labor, raw materials, or consumable supplies. In economics, the cost of production is defined as the expenditures incurred to obtain the factors of production such as labor, land, and capital, that are needed in the production process of a product.

***according to me cost of the product should be taken into consideration that we should get the profit**

Ex: A clothing company which makes goggles for less than 2 dollars and sell them for more than 15 dollars.

5]supply chain: A supply chain is an entire system of producing and delivering a product or service, from

the very beginning stage of sourcing the raw materials to the final delivery of the product or service to end users.

***Apple has the best supply chain in the world.**

***supply chain depends on structure, inventory control policy, information sharing, customer demand and forecasting method.**

6] Sustainability: The ability to be maintained at certain rate or level.

7] usability: The quality or state of being usable

***usability defines that the features which are available should be easily used by the customers.**

Some tips for Hardware startups

Eco systems:

***Tap relevant expertise to do early design reviews ,electronics,EMI/EMC.Materials,structural,Thermal, Processing and Manufacturing.**

***know your supply chain and its boundaries,choose suppliers early andshare your goal with them.**

System:

***Define,design space well.**

***Focus on system and Integration.**

Components/parts:

***Review manufacturability of parts before prototyping.**

***Distribution cost targets to design engineering.**

***prototyping: Prototyping is an experimental process where design teams implement ideas into tangible forms from paper to digital. Teams build prototypes of varying degrees of fidelity to capture design concepts and test on users. With prototypes, you can refine and validate your designs so your brand can release the right products.**

Field nightmare due to forgotten basics:

Lessons:

***Dissimilar metals in contact corrode (Eg:seals)or material behaviouris not understood properly**

***electronic circuits are sensitive to moisture,vibrations and EMI.**

***User interface design is an art user psychology is involved!**

***set of things that can be designed >set of things that can be manufactured .**

***Bom is not same as the product cost.**

***things need to be serviced .**

Implications

- *Jammed parts ,service cost leakage and cracks in seals.**
- *unpleasant surprises in testing and in operations,solder cracks.**
- *Users 'first impression of the product'.**
- *some materials are hard to machine(Ex titanium).Tolerances for composites can be difficult. Plastics are affected by UV.**
- *Dropped projects,profitability issue.**
- *Servicing may require complete disassembly, Specialized tools and training.**

Summary :

1] Suchithra Sasisekar :founder of Nano pix

Things we learnt from suchithra sasisekar that we should "never give up".

2] Mrs. Shravani S Pawar:founder of Safehands 24*7 Pvt.Ltd

Things we learnt from Shravani S Pawar "that no gender discrimination should be present".

Soft skills Training Program

It is hereby informed to all the B.E 5th sem students to attend soft skills training Program.

Date: 21st to 28th November 2022 (Including Sunday i.e.27th Nov 2022).

Timing: 9am to 5.15pm

Venue:

- **CSE, ECE & EEE:-** Respective Class Rooms.
- **AI&ML:-** LH-1, 3rd floor, Admin & PG Block.
- **Civil:-** SH-2, 2nd floor, Admin & PG Block.
- **Mechanical:-** NETF – 4 & 6, 3rd floor, EEE Block.

Training Fees (Softskills): Rs.2,200/-

Fees should be paid to cashier at Account Section on or before 30th Nov 2022

Note: Softskills training is compulsory for all the BE 5th sem students.

No student should miss the training classes and all the students should attend training classes regularly.

No matter if student will attend or do not attend training classes, all the students should pay the fees (Rs.2,200/-)
